

## Case Management Assessment Service

**BREATH  
+ DEPTH**

**BESLER**  
CONSULTING

With medical necessity, denials, and length of stay driving the revenue cycle of your organization, inefficiencies in Utilization Review and Case Management can result in significant missed revenue opportunities. The Case Management Department of healthcare organizations routinely assesses the medical necessity and determination of the patient's level of care for the setting, based upon physician documentation. An assessment of Case Management services can provide a significant return on investment given what is at stake.

Designed to assist your hospital in capturing appropriate revenue and ensuring regulatory compliance, BESLER Consulting has developed a proactive, comprehensive, Case Management Assessment Service. Our approach will assist your organization in developing a work plan that will improve operational processes, reducing denials and length of stay, and enhancing revenue capture opportunities. The assessment will provide Case Managers with the knowledge and tools required to minimize the impact of Federal Program Integrity recovery audits.

The outcome of the assessment will:

- Ensure you are receiving all of the revenue to which you are entitled
- Decrease length of stay by establishing an efficient Case Management model
- Reduce denials through concurrent review process
- Improve Physician Advisors utilization
- Strengthen compliance practices within the department
- Increase Case Management knowledge of criteria sets
- Enhance Case Managers work flow to facilitate enhanced throughput
