

Boost Your Revenue Integrity Efforts

Most hospitals are under pressure to do more with less, while dealing with:

- Declining reimbursements
- Increased auditing
- Loss of experienced financial talent

Now, you have a new option to improve revenue and cash flow while placing minimal demands on your staff.

Our service doesn't displace your current revenue integrity function – it enhances it.

We combine cutting-edge technology with the expertise of our seasoned coding team to uncover hidden opportunities – and then transform those opportunities into dollars. First, our proprietary system utilizes expert logic to flag claims that may be improperly paid. Our coding experts then research suspect claims and rebill confirmed underpayments.

Stay in control of the entire process with on-demand dashboards that provide real time information about recovery efforts. Approve or deny suggested edits in just a few clicks.

Whether you have an existing revenue integrity team that wants to recover more revenue – or no revenue integrity team at all – BESLER's Revenue Integrity Service can help your hospital capture more revenue and stay compliant.

No costly software implementations. No learning curves. No hassles. Only results.
